

ASSET MANAGEMENT REPORTING

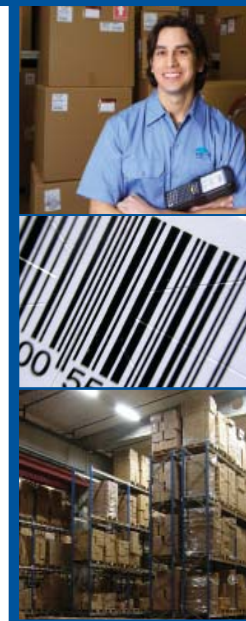

We help companies with workspace transition and expansion – including tracking and managing assets – whether they’re in storage, or in use.

ASSET MANAGEMENT

We can develop an Asset Management Program to address your specific requirements. Whether you need to store, repair, refurbish, deploy or dispose of inventory, your Omni representative can oversee any or every aspect of your asset management program.

REPORTING

Even if your company has gone through a process of getting a handle on your furniture assets, often the tools used to collect and store the data can't really take you past the concept of a "data dump". SnapTracker is the Industry Standard for Furniture Asset Management. It is a software tool that when used in conjunction with best practices methodology is unparalleled in its ability to produce user-friendly, graphical reporting that allows the client to extract true value. SnapTracker uses reporting to support key strategic corporate initiatives, decisions can be made based on facts, and trends can be discovered that provide actual ROI.

Cost Containment

- Know the true cost of warehoused assets
- Isolate groups by "drilling" through the database using any corporate standard
- Reduce storage costs
- Maintain cost-to-own statistics

Inventory Control

- Control asset assignment and physical movement
- Reveal outstanding asset reservations and work orders
- List costly slow-moving items for actions
- Furnish audit trail of asset movement on demand
- Reserve and/or assign inventory for projects in advance

Maintenance & Movement Records

- Identify inventory requiring refurbishment
- Determine cost of upgrades and other alternative courses of action
- Understand status of refurbishment work being performed
- Create/track service requests and control ad-hoc requests
- Record all service work performed

Financial Reporting

- Know the true cost of warehoused assets
- Track product in/out by building cost center
- Furnish audit trail of asset movement when required
- Determine age and condition of assets for depreciation purposes
- Analyze Total Cost of Ownership

Omni is able to create any custom report that you need with our in house SnapTracker and crystal report expert.

ADDITIONAL REPORTS

- Inactive Stock Report
- Cost Avoidance Report
- Incomplete & Damage Report
- Quantity by Condition
